COMPANY

In the early days of its establishment, beauty-100 was dedicated to serving the noble families of the European royal family, and in the same year, beauty-100 Research Office was established. For more than 80 years, beauty-100 has been focusing on the research and development of new technologies and their use in cosmetics, with over 900 patented technologies to date. Up to now, beauty-100's Biological Skincare Research Laboratory has achieved the world's top scientific research results, ranking third in the world in comprehensive cosmetics research, and is the world's top cosmetics research institution.

In 2005, beauty-100 established a branch in Shanghai to focus on developing and maintaining the mainland market; And in 2008, a biological skincare research laboratory was established in Shanghai to vigorously develop the Chinese market. At this point, beauty-100 International Holding Group has established top biological skincare research laboratories and production bases in Europe, North America, and Asia; Develop more targeted new technologies and products based on different ethnic groups and skin types in each region. beauty-100 is a research and production base with international standards jointly invested and established by beauty-100 International Holdings Group Co., Ltd. and Ouyin (Shanghai) Biotechnology Co., Ltd. The company implements the international purification standard of GMP 100000, and the production water reaches injection level. All hardware facilities are strictly implemented in accordance with the highest requirements of the European Union, making it a first-class cosmetics production enterprise in China.

Facial fragrance essential oil

Essential oils are a way of life.

Every plant is a messenger of energy, a natural elf;

The fragrance of plants brings a positive mental state. Its high-frequency vibration energy can help filter and transform low-frequency negative emotions, quickly improve people's feelings and emotions, and nourish and soothe the soul.

Aromatic essential oil can not only improve the smell, but also improve the working and learning environment, making it more positive.

Let the fragrance of plants guide your energy flow and move forward step by step

- Relieve soreness and pain
- Improving sleep

In the Yellow Emperor's Inner Canon, it is said that "spring is for health preservation, summer is for growth, autumn is for harvest, and winter is for storage", indicating that health preservation is closely related to natural changes System. Only by following the changes and changes in natural phenology can we truly achieve reasonable health preservation and longevity. Spring is the beginning of the growth of yang and the disappearance of yin, and the key is to cultivate yang. Spring is the main season for growth, and all things are in the season. The liver qi responds internally, and the way to nourish life is to focus on nourishing the liver. Summer is the extreme period for the growth of yang and the disappearance of yin. Summer is the main season for growth, and all things are flourishing. The internal energy of the heart should be balanced, and health preservation should focus on nourishing the heart. Autumn is a time when yin grows and yang dissipates, and the key is to nourish yin. Autumn is the main harvest season, everything converges, and the lung qi responds internally. Health preservation should focus on nourishing the lungs. In winter, the earth collects everything, and all things are hidden. Kidney qi is mainly stored in response, and health preservation should focus on nourishing the kidneys. Conversely, it can harm the kidneys.

Herbal maintenance mud film

Mechanism and action of mud moxibustion
1. With the help of hot yang
With the help of heat, warm and strengthen the yang qi. This imported heat can stimulate the essence and qi in the human body through the lesion or specific area, stimulate the circulation of blood and qi, and warm and strengthen the yang qi in the organs.
2. Open the door to ward off evil spirits
Special penetrating drugs reach the lesion directly at the shortest distance, and apply mud moxibustion to the acupoints and meridians to open the outer door of the meridians, providing a way out for evil.
3. Using heat to generate heat
Accelerate blood circulation, promote metabolism, and use heat to open the external door, allowing toxic heat to leak out and expel pathogenic substances from the body.
